

DRAIN drops® is an ophthalmic solution based on iTRAB®, highly concentrated polyphenols $\geq 2.5\%$ in 0.25% sodium hyaluronate, capable of counteracting oxidative damage related to physiological alterations of the anterior segment of the eye. DRAIN drops® is indicated as an adjuvant treatment in the hypotensive therapy of glaucoma.

INDICATIONS

DRAIN drops®, thanks to its unique qualitative and quantitative composition, is also indicated in cases of: • Conjunctival redness or hyperemia • Sensations of discomfort in the eyes due to the side effects of chronic drug therapy. For contact lens wearers: instilling DRAIN drops® before putting on contact lenses facilitates application by improving their wettability; furthermore, instilling them after application makes them more comfortable to wear, counteracting the sensation of dryness and possible ocular complications.

COMPOSITION

iTRAB® (highly concentrated polyphenols $\geq 2.5\%$ - from Perilla extract f. 0.15% - in sodium hyaluronate 0.25%), sodium chloride, dibasic sodium phosphate anhydrous, sodium phosphate monobasic monohydrate, purified water to 100 mL.

DIRECTIONS FOR USE

1. Break the safety seal on the bottle
2. Remove the protective cap
3. Gently squeeze the container and instill 1 or 2 drops
in each eye or as directed by your doctor
4. After instillation, immediately close the container and reuse
the remaining contents within 3 months of opening
5. The product is for single-patient use

WARNINGS

- The product is for external ophthalmic use only.
- Once opened, the container must be closed with the appropriate cap, but the solution contained must be used within 3 months of opening the bottle.
- Before instillation, check that there is no residue on the dispenser opening. If there is, clean with a wet cloth and drop a drop before use.
- Do not use the product if the packaging is damaged or if the bottle is not perfectly intact.
- Do not tamper with or damage the dropper or the dispensing opening for any reason, otherwise the sterility of the product may be compromised.
- Keep out of reach of children.

- Before opening the bottle to administer the drops, it is advisable to thoroughly wash your hands.
- During instillation, do not touch your eye or other surfaces with the dispensing end of the bottle.
- Do not use the product if you are known to be incompatible with even one component of the formulation. If necessary, check with your optician to ensure the compatibility of the eye drops with your contact lenses.
- If you experience any discomfort during use, discontinue use and consult a doctor.
- Any ophthalmic medications should be administered at least 15 minutes after instilling the eye drops, especially if they contain benzalkonium chloride or other quaternary ammonium salts, to avoid precipitation of hyaluronic acid.
- Ophthalmic medications administered simultaneously with the eye drops must be administered under the supervision of a doctor who can assess the possible interactions.
- Do not use the product after the expiration date indicated on the packaging.
- Do not dispose of the container in the environment after use.
- Store in a dry place, away from heat sources and direct exposure to sunlight, at a temperature not exceeding 25°C.

DRAIN drops® is a slightly hypo-osmolal, slightly viscous, sterile solution with physiological pH, free of preservatives, and is also suitable for frequent and prolonged use.

PACKAGING The package consists of a 10 ml resealable plastic multi-dose container.

SHELF-LIFE: 24 months for unopened packaging.
